1. Summary of Significant Accounting Policies and Going Concern

A. Accounting Practices

Kin Interinsurance Network (KIN) ("the Reciprocal") was organized as a reciprocal exchange under the laws of Florida, existing for the benefit of its subscribers. As a reciprocal insurance exchange, KIN is an unincorporated association of subscribers operating through the contractual arrangements set forth in a Subscriber's Agreement and Power of Attorney which all subscribers must sign. Under Florida law and pursuant to the Agreement, KIN and its subscribers appoint Kin Risk Management (KRM) as an attorney-in-fact (AIF), to manage and administer KIN's operations and affairs on behalf of all of the subscribers. This agreement between KIN and the AIF, KRM, became effective June 25, 2019.

The financial statements of the Reciprocal are presented on the basis of accounting practices prescribed or permitted by the Office of Insurance Regulation of the State of Florida.

The Office of Insurance Regulation of the State of Florida recognizes only statutory accounting practices prescribed or permitted by the State of Florida for determining and reporting the financial condition and results of operations of an insurance company, for determining its solvency under the Florida Insurance Law. The National Association of Insurance Commissioners' (NAIC) *Accounting Practices and Procedures Manual (NAIC SAP)* has been adopted as a component of prescribed or permitted practices by the State of Florida.

The reciprocal records unearned subscriber fees(fees to attorney-in-fact) paid as deductions from the unearned premium reserves and charges current operations on a pro rata basis over the periods covered by the policies as described by the OIR.

A reconciliation of the Company's net income and capital and surplus between NAIC SAP and practices prescribed and permitted by the State of the Company is shown below:

B. Use of Estimates in the Preparation of the Financial Statements

The preparation of financial statements in conformity with Statutory Accounting Principles requires management to make estimates and assumptions that affect the reported amounts of assets and liabilities. It also requires disclosure of contingent assets and liabilities at the date of the financial statements and the reported amounts of revenue and expenses during the period. Actual results could differ from those estimates.

C. Accounting Policy

Direct and ceded premiums are earned ratably over the terms of the related policies and reinsurance contracts. Unearned premium reserves are established to cover the unexpired portion of premiums written. Such reserves are computed by pro rata methods.

Expenses incurred in connection with acquiring new insurance business, including such acquisition costs as sales commissions, are charged to operations as incurred. Expenses incurred are reduced for ceding allowances received or receivable.

Net investment income earned consists primarily of interest less investment related expenses. Interest is recognized on an accrual basis. Net realized capital gains (losses) are recognized on a specific identification basis when securities are sold, redeemed or otherwise disposed. Realized capital losses include write-downs for impairments considered to be other than temporary.

In addition, the Reciprocal uses the following accounting policies:

- (1) Short-term investments are stated at fair market value.
- (2) Investment grade bonds not backed by other loans are stated at amortized cost using the interest method. Non-investment grade bonds with NAIC designations of 3 through 6 are stated at the lower of amortized cost or fair value. The Company's bond portfolio is reviewed quarterly and as a result the carrying value of a bond may be reduced to reflect changes in valuation resulting from asset impairment. The Company does not hold any mandatory convertible securities or SVO-Identified investments.
- (3) Common stocks are stated at fair market value.
- (4) Not applicable as the Company does not hold preferred stock.
- (5) Not applicable as the Company does not hold mortgage loans.
- (6) Loan-backed securities are stated at either amortized cost or the lower of amortized cost or fair value. Investment grade loan- backed securities are stated at amortized cost. The prospective adjustment method is used to determine amortized value for all loan-backed securities.
- (7) Not applicable as the Company does not hold any investments in subsidiaries, controlled and affiliated entities.
- (8) Not applicable as the Company does not hold joint ventures, partnerships or LLCs.

The methods for making such estimates and for establishing the resulting liabilities are continually reviewed and any adjustments are reflected in the period determined.

20. Fair Value Measurements

A. Fair Value Measurement

SSAP 100, Fair Value Measurements, establishes a framework for measuring fair value. That framework provides a fair value hierarchy that prioritizes the inputs to valuation techniques used to measure fair value. The three levels of the fair value hierarchy are described as follows:

- Level 1 – Inputs to the valuation methodology are unadjusted quoted prices for identical assets or liabilities in active markets that the Company has the ability to access.
- Level 2 – Inputs to the valuation methodology include quoted prices for similar assets or liabilities in active markets; quoted prices for identical or similar assets or liabilities in inactive markets; inputs other than quoted prices that are observable; or inputs that are derived principally from or corroborated by observable market data by correlation or other means.
- Level 3 – Inputs to the valuation methodology are unobservable and significant to the fair value measurement.

The fair value measurement level within the fair value hierarchy is based on the lowest level of any input that is significant to the fair value measurement. The Company believes its valuation methods are appropriate and consistent with other market participants. The use of different methodologies or assumptions to determine the fair value of certain financial instruments could result in a different fair value measurement at the reporting date.

Bonds: Comprised of corporate securities that are measured at fair value due to ratings of 3 or lower as prescribed by the NAIC's valuation methods. Valuation is based on inputs including quoted prices for identical or similar assets in inactive markets. The Company uses a leading, nationally recognized provider of financial market data and analytics to price the Company's bond holdings. Because many fixed income securities do not trade on a daily basis, the provider's evaluated pricing applications apply available information through processes such as benchmark curves, benchmarking of like securities, sector groupings, and matrix pricing to prepare evaluations.
